

Steel plate for for Boiler Pressure Vessel JISG3115SPV 235

SPV 235 steel plate, JISG3115 SPV 235 steel plates is a kind of material for boiler and pressure vessel steel. JISG3115ST E 255 steel plates is characterized by a minimum yield strength of 170-230MPa and by good weldability, so SPV 235 steel is mainly used to for manufacturing boilers, pressure vessels and pipes transporting hot liquids. the following are JISG3115 SPV 235 steel plate's Chemical composition and mechanical properties

If you are looking for Chinese SPV 235 steel supplier, if you want to know SPV 235 steel price, please be free to contact us.
